

Iyanola Apiculture Collective Online Beekeeping Course

The following are important guidance notes for completion of the online beekeeping course:

1. The course content is available free online at <https://iyanolaapiculture.org/training/>
2. The course consists of 17 modules: 14 theoretical and 3 practical. The three practical modules do not have content in them and as such, would not open in a new website. The three practical modules which should therefore be ignored are:
 - a. 9-Prac Dis. Hive inspection
 - b. 11- Prac Colony Expansion Techniques
 - c. 14-Prac Honey Extraction
3. Each week you will be expected to review 2 modules on your own. This involves watching the video and reading the notes on each side.
4. Each module has its own quiz. You must pass the quiz in order to complete the course and receive the certificate. The pass mark for each quiz is 80%. The quiz will be open only for 2 weeks, after which it will be closed until week 7, when it will be reopened for revision.
5. Since you are required to do 2 modules per week, you should complete the entire theoretical course in 7 weeks. In week 8, you will be required to complete a final exam, which will consist of content from all of the 14 modules. The pass mark for this final exam is 80% and you must also pass this exam in order to get the certificate.
6. Graduation for the online beekeeping course should be at the end of August 2022.
